

Product manager-turned-developer with expertise in AI, automation, and cloud. Skilled in architecting solutions, delivering ROI-focused demos, and bridging technical and business needs.

RELEVANT EXPERIENCE

AI Solution Engineer — <i>Waive AI; Remote</i>	1 Year; 2023 - Present
• Led end-to-end automation projects including process mapping and consulting on data intake, processing, and automation architecture. • Developed an AI-driven email management system that reduced costs by 84% and integrated OpenAI APIs, Pinecone DB, and custom agent tooling. • Regularly consult with stakeholders on where traditional algorithms versus AI-driven approaches add value—translating technical details into quantifiable labor hour savings and ROI.	
Product Manager — <i>Backroads; Europe & The Americas</i>	5+ Years; 2017-2022
• Managed logistics and client relations for high-profile active travel trips, building trust with C-suite clientele through dynamic, technical presentations. • Collaborated directly with the COO and Head of Product to design an automation architecture aimed at eliminating 12–14 weeks of manual scheduling labor for an entire department. • Negotiated contracts and maintained strong partnerships with subcontractors and business partners, ensuring seamless execution and client satisfaction.	

SELECTED PROJECTS & DEMOS

Real Estate Social Media Automation
• Developed a Python-based software solution that automates client onboarding, personalized content generation, and scheduled posting via integrations with Airtable, Make.com, and Flask. • Produced demo videos showcasing rapid generation of social media posts (3 days’ worth in 3 minutes) for real estate professionals.
Automated Communications & Chatbot Solutions
• Built an application that parsed complex documents and drafted confirmation emails for guides/subcontractors—reducing manual effort from one hour to under 5 minutes. • Developed a RAG-centric EventGPT chatbot on WhatsApp via Twilio to deliver real-time event information and answer logistical queries.
Machine Learning Ops for Automated Stock Trading
• Engineered and implemented an advanced machine learning pipeline for automated stock trading, incorporating genetic programming for feature optimization and AutoML techniques for model selection. • Developed a sophisticated two-stage feature selection process and implemented rigorous model evaluation, integrating the final model with a brokerage API for live trading execution

TECHNICAL SKILLS

- **Languages & Frameworks:** Python, SQL, Flask, Git
- **AI/ML & Automation:** OpenAI APIs, Neural Nets, NLP, Hugging Face, Prompt Engineering
- **Advanced ML Techniques:** Genetic Programming, AutoML, Feature Engineering/Selection, Advanced Model Evaluation Metrics (F-beta score, AUPRC), Time Series Analysis
- **Cloud & Integrations:** AWS (S3), Google Cloud (Maps & Gmail APIs), Custom API Development, Pinecone DB, Airtable, Make.com, Twilio, Custom API’s, API Integrations for Financial Trading

EDUCATION

M.S. Quantitative Economics; 4.0 GPA	California Polytechnic State University	San Luis Obispo, CA; 2022
B.S. Environmental Studies; 3.85 GPA	University of Oregon	Eugene, OR ; 2012
